

## BELLARIA

Bellaria is made of 100% recycled plastic material GRS. The fabric is dense, but still lets light through due to a slightly coarser structure. The softness of the fabric and a slightly heavier fall gives a nice drape. The colour scale is earthy and rich, the colours have an even tone due to the fabrics being dyed in one piece.

By offering a fabric in 100% recycled plastic material we want to contribute with a first step towards a more sustainable textile industry. The material used to produce the threads is both pre consumer and post consumer waste and completely traceable according to GRS requirements.

Please be aware that screen colours, printer colours and fabric dye batches may vary.
